

Broadley Garden Centre

IT & E-commerce:

Objective

The owners of this flourishing business on the outskirts of Nairn were looking for a new website to promote their services to existing and new customers. Although the business had been trading for over 10 years, it had no online presence and the owners wanted an easy-to-use solution that they could manage without having too much technical know-how.

The Work

SSB arranged a design around the owners' specification working with them to meet their requirements, and ensuring they were comfortable with future amendments and editing as desired.

Results

The owners have received good feedback and believe it is helping to bring in extra business through its attractive, easy-to-use, and welcoming design.
